

Revision round #2

Decision for round #2 : *Revision needed*

The revised version is much improved, and the only further revision needed is mainly typographical.

In the Abstract (and because it is in the abstract) you refer to '*even on low stressful days*', which should be replaced by '*even on days with lower TRH*' - or words to that effect, as you did not measure stress directly.

We modified the sentence as requested in the Abstract. We modified it as well in the Discussion for the sub-section "*An active shade use even on lower TRH days that may indicate thermal discomfort and risk of heat stress*"

In Figures 2 and 4, there are some stray arrows and treatment names on the right-hand side. And in Figure 7, there is a down-pointing arrow missing in the top left-hand graph.

We checked the figures 2, 4 and 7 and added the missing elements.
